The "Premier Nutrition Effect"

The human cell has a crystalline matrix, which means it has an ideal resonant frequency. We believe that only nutrients from "once living" sources can sustain the ideal resonant frequency of your body's cells.

When premier quality nutrients (exquisitely well grown, free of toxic tag-alongs) are combined together, their effect can be far greater than the sum of their individual benefits: the "Premier Nutrition Effect." A **quanta-ceutical™** is a nutraceutical supplement that tests on to all four biofield polarities, thus delivering the "Premier Nutrition Effect" to support optimal health.

Premier Quality Nutrients Without the Risk

Our premier quality guarantee:

- No magnesium stearate, an undesirable oil that can suppress the immune system
- No animal glandulars with toxic tag-alongs and unwanted animal hormones
- No tablets with toxic tag-along binders and fillers
- No excipients - Excipients are highly questionable (often problematic) fillers and binders which are commonly added to nutritional products.

These products have been manufactured in an NSF-GMP registered facility. The prestigious NSF symbol signifies that our manufacturing plant has met rigorous NSF quality assurance standards.

Max B-ND™

Dietary Supplement

End-Chain, Live-Source B Vitamins

*Probiotic-Cultured Formula
Featuring ND Technology™*

*Maximum Liver, Brain, Energy and
Mood Support*

Max B-ND™ is a nutritional industry first - with never before available probiotic-cultured B vitamins. It contains a high-energy, end-chain, B vitamin complex derived from live sources for premier nutritional resonance. Each 1/2 teaspoon supplies high energy, end-chain vitamin B forms (the form ready to use by the cell) including vitamin B6 as pyridoxal, pyridoxine, pyridoxamine, vitamin B5 as pantotheine (and more), folic acid as 5-MTHF and 5-THF and much more.

This B vitamin-rich formula offers advanced support for the liver, energy, brain, cardiovascular system, adrenals and mood balance. Research suggests that live sources of B vitamins are preferred over common synthetic (coal tar-derived) sources.

ND Technology™ (Nanized Delivery)

Our premier-quality formula is micro-digested into extremely small bio-available particles using our proprietary fermentation process via unique multi-strain, probiotic colonies. This allows rapid cellular delivery and 4-polarity dynamics, unlike any other product. Many people say they can feel the effect of this product the very first time they take it.

This formula is preserved with certified organic alcohol with no detectable pesticide and heavy metal residues (via lab testing).
